EXPERIENCE

Text Q&A

Collaborative Project, Front-End Developer, Jan 2023 - Present

An interactive question-and-answer app that allows users to get real-time answers to questions posed during live talks

- Partaking in the integration of server-side web applications using Express, enhancing code maintainability and reducing runtime errors.
- Contributing to the use of Firebase as a real-time database platform, ensuring high availability and reliability of the application.
- Implementing React and Server-Side Events (SSE) to provide instant notifications, enhancing the real-time interaction experience.
- Utilizing global state management using React's Context API feature
- Managing the project lifecycle, demonstrating strong project management skills

CANVAS for Works

Freelance, Front-End Developer, Oct 2022 - Oct 2024

Developed with React, a portfolio website for a creative design agency

- Contributed to a 70% increase in web traffic, & substantial rise in client enquiries.
- Leveraging React technologies such as hooks for efficient state management, client-side routing for seamless navigation, reusable components for maintainability.
- Implemented elegant AOS animations and clean, responsive design using SASS and LESS, ensuring a seamless experience across all devices and browsers.
- Collaborated closely with the agency's design team.

Fully Captured

Freelance, Front-End Developer, Digital Designer, Jan 2023 - Aug 2023

A personal project that's posed as a cloud-based mobile messaging app

- Utilized React hooks for efficient state management. Leveraged Javascript array methods for efficient data manipulations and rendering.
- Implemented robust data fetching and handling using the Fetch API to interact with a JSON Server database, ensuring reliable and efficient data retrieval.
- Demonstrated strong problem-solving skills by handling potential errors.
- Ensuring consistent functionality across different devices and browsers.
